EMERGENCY INSTRUCTIONS - PCBs

P. G. Benignus - B2SC
R. L. Koch - B2SC
E. M. Potter - B2NK

Mr. T. W. Oneson
Montreal - 5090

Earl Potter asked me to respond to your request for an Instruction Kit which you mentioned in your Call Report to Westinghouse Canada Limited dated January 15, 1974.

We do not actually have a "Kit" which we issue to each driver. The only warnings we convey are by stamping the bill of lading with a PCB statement and emergency telephone numbers. Copies of these are attached. We have advised the employers of the drivers to provide appropriate instructions. I have not personally seen any evidence that the drivers have been given specific instructions.
