AUDITONE

FIBER ACOUSTICAL TILE

FOR QUIET THAT PAYS FOR ITSELF

NOISE COSTS MONEY... in frayed nerves, multiplied mistakes, increased operating costs. Don't let noise rob you! Sound condition with AUDITONE now, to blot up noise, increase employee efficiency, improve customer comfort, build profits.

HERE'S HIGH NOISE REDUCTION... at a low cost, combined in a handsome, modern slotted tile design for ceilings or walls. Official Noise Reduction Coefficients are .65 and .70 for ¾" and 1" thicknesses respectively.

HIGH LIGHT REFLECTION... To make the most of your lighting sources, AUDITONE acoustical tile is finish painted in white at the factory and has a light reflection of 74 per cent for plain border tile and 72 per cent for slotted tile.

RESISTS SOILING... The smooth painted finish resists soiling, requires little maintenance.

VERSATILE DECORATION... See the variety of designs that can be achieved with this handsome slotted tile combined with plain border tile, simply by turning the tile to change the direction of slots! Either diagonal or square patterns may be used.

RAPID, EASY INSTALLATION... It takes only a few hours—at minimum inconvenience to room tenants—to cement bevel edge AUDITONE in place or to blind-nail tongue-and-groove edge AUDITONE directly to joists, studs, or nailing strips.

EASILY MAINTAINED... Quickly and easily cleaned. Can be brush or spray painted many times without reducing the Noise Reduction Coefficient.
