Comptroller's

Martin-Seneour, Chicago

Oct. 2, 1935

T. V. Alsop

Inventory

Please refer to page 10 of the raw material inventory for Chicago, Rex (1784) - 10 gallons are priced at \$1.55 per gallon and extended as \$15.50. We believe this should be priced at \$15.50 per gallon. This would make an increase in the value of this material of \$139.50.

Please verify these prices, but we are quite sure that this is a high-priced material.

L. REESE,

Comptroller.
