Attention: Frank Marshal, Senior Technical Service Engineer

Frank,

Enclosed are two samples of pellitized material we have manufactured for use by CKR. These are experimental compounds based on your analysis of "CKR compound". We have sent these compounds to CKR for their "trial". We would, however, like to have you run your Brabender torque, and melt flow. This way we can have a direct comparison between these compounds and "CKR compound". We do not need the chemical analysis of these compounds since we know what went into them.

If you have any questions, feel free to call either myself or Dick Znidarsic.

Thanks for your help and cooperation.

Jon Little

Memorandum

To: FRANK MARSHAL OCCIDENTAL CHEMICAL CORP. Date: 2-20-90

Subject: CHARDON SAMPLES FOR YOUR EVALUATION

Message:

FRANK,

THE TWO SAMPLES ENCLOSED FOR YOUR
EVALUATION ARE AS FOLLOWS:

CHARDON COMPOUND #3273 A

#3273 B

I HAVE MARKED THE BAGS ENCLOSED AS
ABOVE

THANKS AGAIN

Put It in Writing
Avoid Mistakes

Signed

Jon Yates
