Confirming information given you by phone today:
1. On 5.0 705 751-2, Turbine Engineering began the
practice of calling for Mono-Block insulation and
plan to use this material on all steam turbines
in the future. This material is composed of mineral
wool with a clay filler and is sold by Keen Industrial
Insulation, 500 Breunig Ave, Trenton, N.J. It
is completely free of asbestos.

2. Engr. ~~Beaman~~ called for John Mansville's Thermal
Asbestos or Thermal Block #12.

3. "Mono-Block" may be used on any steam turbine
that now calls for "Thermal" (our old asbestos mat).
For use on steam turbines, "Mono-Block" is the
item that should be stocked.

S. Beaman
