

1 So that what we have is that, for this
2 period from 1993 to the year 2001, approximately
3 seven, eight years, the present value of the loss of
4 household services in the case of Mr. Grewe is about
5 \$39,256.

6 Q Other than the discount rate, were there any
7 other assumptions you considered?

8 A Yes. This figure of \$4,217 in 1987, we
9 increased that by the inflation rate so that the 1987
10 value in terms of purchasing power remains the same.
11 So, the \$49,960 is really the 1996 figures adjusted by
12 inflation. So, the adjustments are for inflation and
13 to discount the present value.

14 Q The household figures that you provided,
15 are those also to a reasonable degree of economic
16 certainty?

17 A Yes.

18 Q And have you ascertained a total economic
19 loss in the case of Mr. Grewe?

20 A Yes. The total loss, if we go for the
21 earnings loss, and these are in present value, again,
