ODP White Lead is put up in strong steel kegs. These kegs protect the lead much better than the old-fashioned wooden packages, as the steel keeps out moisture and air and does not absorb the oil. The lead is always as fresh and in as good condition as when it left the mill. When empty, the steel packages are easily cleaned and may be put to a hundred different uses in the paint-shop or around the house. ODP is the best lead it is possible to make, and it is put up in the best packages we could find.

ODP White Lead is sold in 1, 2 and 5-pound tins, 12½, 25, 50 and 100-pound steel packages, and 300 and 500 pound casks.

WHITE LEAD

THE SHERWIN-WILLIAMS ODP White Lead in Oil is one of the most thoroughly attractive propositions ever offered to the paint trade and general public at large. ODP Lead is soft in the package and easy to work up, yet it preserves a covering capacity and wearing consistency which is unexcelled. It is pure—absolutely. Here's a guarantee that appears on every package:

This package warranted to contain nothing but Strictly Pure White Lead, ground in Strictly Pure Linseed Oil, and we pay one ounce of gold for every ounce of adulteration it may be found to contain.

ODP is of the same high quality which is found in every other Sherwin-Williams product, whether it be a paint, varnish, stain or enamel. The Sherwin-Williams line is recognized the world over as being the best possible goods for the particular purpose for which they are intended.
