I agree with your approach to suggest Dr. Carl G. Gustafson as the author of a PCB chapter for the Terra Society book.

I am taking the liberty of sending your memo and the Terra Society letter to Dr. Ira D. Hill. He may want to provide you with names of possible authors for the phosphates chapter. Such a suggestion could be incorporated in your reply letter to the Terra Society. If they have already selected a phosphates author it may be interesting for us to know who he is.
