FROM: A.H. Bagenstose

SUBJECT: Bell Asbestos Mines' Booklet
"Taking Care with Asbestos"
with covering letter

DATE: May 29, 1980

CC:

I find Leblond's covering letter irritating. When reading I feel like I am being lectured to. Also, the second paragraph reads like Dr. Selikoff. For example "For some, there is no known safe level of exposure".

The booklet is written for hourly employees, not owners or management, and it reads like it was written by a union leader. I wonder how many companies will pass them on to their employees.

If we believe asbestos is as dangerous as Bell Asbestos warns, then we should also do the same. No wonder Turner & Newall are getting out of the asbestos business.

I think we should distribute something to our customers, but I would make a softer pitch.
