Dear Sir:

Re: Manual of Testing Procedures

We have now received our order of the second edition of the Manual of Testing Procedures for Chrysotile Asbestos Fibre and are forwarding you under separate cover, 6 copies for distribution to customers in your area.

This new manual has a more comprehensive coverage of the procedures in use for the testing of asbestos fibres than the original publication and includes the following tests not covered in the first edition.

- 1) Wash Test
- 2) Rapid Surface Area
- 3) Compressibility and Recovery
- 4) Drainage Rate
- 5) Loose Density
- 6) Freeness
- 7) Grit and Spicule
- 8) Moisture Content
- 9) Soluble Chlorides
- 10) Kerosene Retention

Several procedures have been amended and others which are rarely used in the industry are omitted.

Please try to impress on your customers that the test methods listed in this book are proven procedures which should be used when it becomes necessary to report test results to us. Also we cannot overemphasize the importance of complying with the procedures for taking samples when applicable.

ASBESTOS CORPORATION LIMITED TO Charles A. Wagner Co. Inc.,

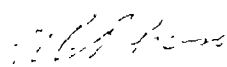

- 2 -

Distribution of the manual should be limited to a large extent to technical men.

Please let us have the names of those who have been given a copy of the manual for our records.

Yours very truly,

ASBESTOS CORPORATION LIMITED
