Bell Laboratories

subject: Asbestos Removal
Case 48100-1

date: December 3, 1981

from: D. Rainer
MH 78691
3A-213 x7512

Mr. Jim Kennedy:

Per our discussions and meeting on the above referenced subject, enclosed for your review are guidelines issued by the Environmental Protection Agency (EPA) on asbestos removal from schools. I believe that all contractors performing asbestos removal within the MH complex should at a minimum comply with the points that I highlighted under the section entitled "Specifications and Requirements for Contractors," and the points I covered in my previous memorandums on the topic.

I would be glad to review any requirements issued to contractors and or assist you in developing complete work requirements for contractors performing asbestos removal.

David Rainer
