

Fuller Rotary Compressors

put the

on

compression costs

...for pressures up to 125 lb.

Three Fuller Rotary Single-stage Compressors. Capacity each 1400 c.f.m., 19-lb. pressure.

Fuller Rotary Single-stage Duplex Compressor. Capacity 2010 c.f.m., 35-lb. pressure.

Fuller Rotary Two-stage Compressor. Capacity 1665 c.f.m., 100-lb. pressure.

When you consider all the many uses you have for compressed air, you should give careful thought to the best way to get compression with dependability, plus minimum cost and attention—selection of the proper compressor at the required pressures to do the work in the most efficient manner. Fuller builds the compressor that has earned a reputation for dependability and long life—for pressures up to 125 psig.

Fuller Rotaries have so many inherent advantages that they warrant your closest examination. Free from reciprocating parts, with no valves to leak or seats to grind, no unbalanced forces to set up vibration, they assure low-cost, smooth-flow operation during their long life. And, they give you *original, maintained capacity*.

Check your compressed-air needs . . . a Fuller engineer, specializing in compressed-air engineering, will give you the *right* recommendation to enable you to produce air efficiently, and at the lowest possible cost. Write now.

Pioneers of high-efficiency vane-type rotary compressors

NAVCO
is an
important part
of America's
Power Plant
Expansion!

For almost fifty years Navco has specialized in Power Plant Piping. Today, with the Central Station Industry in the midst of an expansion program without precedent, Navco plays a very vital part of this growth. Navco offers the facilities of two complete fabricating plants, one of the most modern Piping Research Laboratories in the country and a large Construction Department manned by personnel experienced in all phases of High Temperature Power Plant Piping.
