SUBJ: FEDERAL COMMUNITY RIGHT-TO-KNOW PROVISIONS

VISTA

Enclosed for your review is an outline and the full text of the Right-To-Know provisions recently agreed to by Superfund conferees.

These provisions will not become law until the House and Senate vote and the President signs. However, it is not expected that much will change.

The reporting requirements and the affected chemicals are many. Significant changes may be required in individual plant reporting protocols and man hours will be needed to prepare the required documents and reporting forms.

SUBJ: PROGRESS REPORT FOR THE WEEK ENDING SEPTEMBER 26, 1986

VISTA

1. JCL gave a talk on hazardous waste to a group of Communications people from Finland.
2. Submitted comments to EPA on their proposed Toxic Characteristic Leaching Procedure.
3. Submitted revised Letters of Credit to the State of Louisiana covering LCCC financial assurance requirements.
4. Issued a draft report on the recent LCCP Ethylene Plant Environmental Audit.
5. Drafted comments for internal review on EPA's proposal to eliminate the 90-day storage exemption under RCRA.
6. Attended a meeting with the Louisiana DEQ and LCA to discuss the proposed Asbestos Entity/Worker Registration, Education and Training regulation. At this point, the proposal contains burdensome training requirements that are inconsistent with OSHA Asbestos regulations.
7. Advised the surfactant business area on procedures necessary to register a tobacco suckerant blended product or register as a supplemental distributor of a DeSoto product. As a supplemental distributor, we can market DeSoto's registered product under our product name.
8. Began reviewing a polymers product development activity to determine if a PMN would be required for the product. Initial review indicates the product is probably a mixture by TSCA definition.
9. Contacted the Vista Brussels' office to request assistance in obtaining a MSDS and TSCA certification for the Olefina/Petrofina product, RADIASURF 7135.
10. Issued the PMN for CATAPAL XD Alumina.
11. Approved MSDS artwork for Premiere Polymers.
