DOCUMENTS FROM AI ARCHIVES

Dear Sirs:

For your information we take pleasure in sending from our library, current year's fourth shipment of documents dealing with asbestos and health, as follows:

AI Nos.:

6550	6600	1513
6564	6601	588
6570	6602	592
6579	6723	593
6598	6769	602
6599	1505	618
		627

Yours truly,

A16423

Premysl V. Pelnar, M.D.

Gross, Paul & deTreville, Robert T.P.					
KEY CODE	KEY WORD OR CHARACTERISTIC			SCOPE NOTES	
43	The Pulmonary Response to Coalinga			Not to Circulate	
40	Asbestos Dust: A Preliminary			Investigation	
53	Investigation				
72	Ind. Hy. Foundation, July 1968				
52	FINAL REPORT - NOT PUBLISHED				
80 20					

Evaluation: This study was undertaken to determine the relative pathogenicity of Coalinga chrysotile from California with Canadian chrysotile and other non-asbestos dusts when injected into the trachea of rats. It was found that Coalinga dust produces effects similar to Canadian chrysotile. "The lesions observed in the lungs of these rats suggest that the pathogenic potential of Coalinga dust resembles that of chrysotile dust. Whether this potential is less or greater than that of chrysotile dust cannot be determined from the available data."
