DRYWALL FINISHES & SPECIALTY COATINGS

To: Julius K. Nemeth Date December 22, 1976

From: Myrle Self Subject

Dear Julius:

In reference to your letter of November 29, 1976 concerning the cancellation of Johns Manville of the manufacture of 7RF02 Asbestos, we did not receive a letter regarding this but the salesman did advise Kelly of this verbally.

With regard to discontinuance of Asbestos in our products, all of our products still have Asbestos with the exception of our latex paints. All Joint Compounds, Textures, and Ready Mix does contain Asbestos. We do make a non-Asbestos in Aristex, "3 in 1" Powder, Set-Fast, and Topping Compound, but only if they are requested.

The following are the Plant Managers at our various plant locations:

Kaufman, Texas.....Ron Knott
Cambridge City, Indiana....Wayne Mansfield
Waycross, Georgia.....Bob Dubose
Madison, South Dakota.....Harold George

If there is any other information needed, please let me know.

Sincerely yours,

Myrle
