VINYL CHLORIDE EXCURSION SAMPLE

The results of your Vinyl Chloride exposure on 2/10/86 while disconnecting the ship METTE THOLSTROP was 6.09 ppm. You wore a fresh air mask while performing this job; therefore, this is only a potential exposure. There was no actual respiratory exposure to Vinyl Chloride.

You may make arrangements with our medical for a physical if you so desire.

E. J. Singleton
Industrial Hygiene
Marine/Railroad
