Dr. K. W. Greenlee
American Petroleum Institute
Research Project 45
Ohio State University
Columbus 10, Ohio

Dear Dr. Greenlee:

We have received the two samples of n-decylbenzene and n-decylcyclohexane in good order. We appreciate very much your cooperation in making these materials available for our study. We shall be frugal in their dispensation and, should the questions concerning their physiological action be answered prior to their complete consumption, the remainders will be returned.

Should you at any time be in our neighborhood, we should be most pleased to have you stop in and see our laboratory. We won't be able to show you any columns currently passing through holes in the floor, but we do have some atrociously high ceilings.

With best regards,

Sincerely yours,

A. Wesley Horton

Dr. A. Wesley Horton
University of Cincinnati
The Kettering Laboratory
College of Medicine - Eden Ave.
Cincinnati 19, Ohio

Dear Dr. Horton:

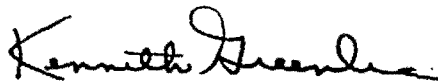

This is to advise you that we are sending you 100 ml. samples of the hydrocarbons you wanted for experiments on carcinogenesis.

<u>Hydrocarbon</u>	<u>Grams</u>	<u>mole % purity</u>
n-decylbenzene	86	99.80 $\pm$ 0.16
n-decylcyclohexane	82	99.5 $\pm$ 0.1

If you consume these samples and still need more, do not hesitate to ask. On the other hand, you might return any portions of them that remain after your work is finished.

We are glad to be able to give you a little boost in your research, which we esteem very highly. Hoping you will visit and/or call on us again, I am

Sincerely yours,

Kenneth W. Greenlee
