Terry,

Ball wanted to talk to Medical about Medical work on contractor employees handling asbestos in A Bldg. D'Armond discussed this with Dr. Myers and he said they did little if any actual checking. Most or all is to be done by contractor's doctors, however, Dr. Myers will be glad to talk to Ball about situation.

Ball said he understood that Ethyl had given contractor an Ethyl procedure for handling asbestos and he asked if he could get copy of procedure. Tell him that Jim Bitting is checking details out now with Zumwalt to see what was given him and D'Armond has discussed situation with Bourque who said he would obtain copy of what was given contractor. So if you need anything on this today work with Bourque and Bitting.
