[REDACTED]

VdMA explained that for them the most pressing topics on chemicals are PFAS and the REACH Revision.

[REDACTED]

On PFAS, [REDACTED] explained the current state of the process. VdMA expressed concerns that many of their members are not even aware that they are using PFAS. Additionally, VdMA explained the difficulties of a PFAS ban and disruptions that could provoke, in particular for industrial uses.

Ultimately, VdMA stressed that the current delay of a decision on a PFAS restriction causes high uncertainty for companies and their investments.
