

ASARCO

BULLETIN ON ASBESTOS PUBLICATIONS

Asarco Central Research Laboratories
American Smelting and Refining Company
South Plainfield, New Jersey 07080

PLAINTIFF'S EXHIBIT

CAP-375

February & March 1970

1. - -
Production statistics for the
3rd and 4th quarters 1968.
Gummi, Asbest. Kunststoffe 22
(12), 1414-15, Dec. 1969. (Ger.)
2. Andryanov, K.A.; Kudishina,
V.A.; & Zhdanov, A.A.
Heat-resistant glue based on
organoelemental compounds - -
having asbestos as an ingred-
ient. Transl. from 1967 Russ.
9 p. AD 697,551 (UGRDR 1/25/70
p.95)
3. Armbrust, B.F. Jr. &
Carithers, V.G. (Reynolds Metals
Co.)
Alumina-asbestos fiber sheet - -
useful for heat insulation and
as a tobacco additive.
US 3,477,865 Nov. 11, 1969.
(CA 72: 14329).
4. Armstrong, G.K.
Development of nonflammable
paper constructions; final rept.
- - including asbestos.
(Dynatech Corp. rep.870)
N70-10026 June 1969. 30 p.
(STAR 08-01).
5. Baer, Hans
Structural correlations in
chemical and polymeric fibers
- - physical properties of
many synthetic and natural
fibers, incl. asbestos.
Melliand Textilber. 50 (10),
1190-4 (1969). (Ger)
(CA 71: 114, 016).
6. Battista, Orlando A.
(FMC Corp.)
Paints containing colloidal
microcrystalline mat-
ter - - viz; chrysotile,
gives stable paint, lub-
ricant, and electrolyte.
Fr. Adon. 92,432. Nov. 8,
1968 (CA 71:126,094).
7. Berkovich, T. M. &
Mikhalevskaya, E. S.
Asbestos-cement hydration
indexes - - found due to
variations in mineralogi-
cal composition. Stroit.
Mater. 1969 (9), 28.
(Russ.) (CA 72: 6000).
8. Brokenbrow, B. E. &
Others.
Asbestos fillers in rubber
- - tensile properties of
vulcanizates increased as
fiber length decreased;
asbestos has little poten-
tial as filler. Rubber J.
151 (10), 61, 64-76 even
no'd, (1969) (CA 71, 125,
689).
9. Broom, G. E. (to Borg-
Warner Corp.)
Rubber-containing fiber-
board. - - process for
preparing a fiberboard
using chrysotile fibers,
rubber binder, and a
plastic material. Ger.
Offen. 1,912,655, 16 Oct.
1969. (CA 72:2200)

ASARCO ALV 0002670

10. Chappellear, David C. et al
(Monsanto Co.)
Polymer foams reinforced with
glass or asbestos fibers - -
up to 40 % fiber for toughness,
tear and tensile strength.
U.S. 3,474,048, Oct. 21, 1969.
(CA 71:125,650).
11. Chwastiak, Stephen
(Union Carbide Corp.)
Asbestos composition for
thickening polyester resins.
- - chrysotile asbestos with
precipitation-deposited sili-
ceous outer layer. U.S. 3,471,438.
Oct. 7, 1969. (CA 71:113,720).
12. Diomidov, A.P. & Others.
Industrial scheme for produc-
ing rough asbestos concentrate
- - fiberizing process. Tr.
Sverdlovsk Gorn. Inst. 1968
(55):5-9. (Russ.) (CA 72:14301).
13. Dodonov, N. T. & Others.
Packing (for a stuffing box)
- - consisting of asbestos
fibers, grease, graphite and
kaolin. USSR 249,869 5 Aug.
1969. (CA 72:33727).
14. Gacia del Real Carvajal, E.
Bituminous, water-repellant
paving materials - - with long-
strand asbestos fiber and other
additives. Span. 350,531, May, 1
1969. (CA 72:4420).
15. Flick, Kurt
Infrared spectrophotometric
study of silicotic and asbestos-
containing dusts - - with i.r.
absorption band locations.
Arbeitsschutz (Cologne) 1969
(7), 161-7 (Ger) (CA 70:6034)
16. Forsyth, T.L.
(Newalls Insulation and
Chemical Co., Ltd.)
Inorganic thermal insula-
tion with dimensional
stability at high tempera-
tures. - - Additional
firing step eliminates
shrinkage and distortion.
Ger. Offen. 1,906,746,
Oct. 9, 1969. (CA 72:
15384).
17. Gadian, T.
Asbestos - a new hazard.
- - relation between
mesothelioma and asbestos
exposures in user and mfg.
industries. Symp Chem.
Process Hazards Spec. Ref.
Plant Des., Proc., 3rd,
1967, 61-5. (CA 70:6013).
18. Gerek, G. & Hartzell,
R.S. (PPG Industries Inc.)
Coated asbestos sheets - -
non-woven, coated with
resinous material on one
surface, and adhesive or
foam on other. Ger. Offen.
1,906,470, Oct. 16, 1969.
(CA 72:4116).
19. Goodhead, K. &
Martindale, R.W.
Determination of amosite
and chrysotile in air-
borne dusts by an x-ray
diffraction method. - -
qualitative and quantita-
tive techniques developed.
Analyst (London) 94 (1124),
985-8, 1969. (CA 72:15537)

20. Heinemann, F. E. & Moore, C.B. (Grace, W.R., Co.) Pressure-sensitive adhesive tape from paper containing asbestos and rubber - - using 5 to 20 % asbestos-containing cellulosic sheet. U.S. 3,466,187 Sep. 9, 1969. (CA 71:114,415).

21. Khazanov, G.M. & Others. Packing (gasket) material - - consisting of rubber, asbestos, and metal oxides. USSR 249,610 5 Aug. 1969. (Russ). (CA 72:33038)

22. Lard, E. W. Development of inorganic non-flammable vermiculite flight paper, phase 1, Feb.-July 1968 - - contains asbestos. (W.R. Grace & Co.) N70-10028. July 1968. 19 p. (STAR 08-01)

23. Malyarova, A.G. Mastic for filling concrete seams - - to raise heat resistance and elastic - plastic properties at negative temperatures, contains asbestos crumbs. USSR 245,638 June 4, 1969 (Russ). (CA 71:128,285).

24. Monsanto Chemicals, Ltd. Polyimides resistant to heat and oxidation - - incl. claim for an asbestos-reinforced laminate. Fr. 1,560,555. Mar. 21, 1969. (CA 71:113,485).

25. Osharin, V.A. & Others. Solution for coloring materials made of asbestos and cement. - - mineral additive such as asbestos 0.5-10 wt. % used to increase resistance of colored surfaces. USSR 247,831, July 4, 1969. (Russ.) (CA 71:128,271)

26. Otoma, T. & Asami, H. Asbestos fibers - - combined with other ingredients and spun. Jap. 69-25,476 25 Oct. 1969. (Jap) (CA 72:33141)

27. Shah, H.V. & Mehta, D.J. Preparation of calcium silicate molded insulation - - which contains asbestos, and effect of different variables on the reaction. Res. Ind. 14 (2), 62-65 (1969). (Engl.) (CA 72:24153)

28. Shannon, L. & Sauber, C.A. (Phillips Petroleum Co.) Drilling fluids containing asbestos and carboxymethyl cellulose - - to increase viscosity of drilling fluids. U.S. 3,471,402, Oct. 7, 1969. (CA 71:126927)

29. Siemens, A.G. Membranes for electrochemical cells. - - made from asbestos or other fiber sheets and binder. Fr. 1,546,172, Nov. 15, 1968. (CA 72:13733).

30. Siemens, A.G. Binderless asbestos membranes - - suitable for gas-liquid electrolytic cells, prepared by soaking in NaOH or KOH. Fr. 1,556,744 7 Feb. 1969. (Fr.) (CA 72:38273)

31. Soc. Anonyme Francaise du Ferodo. Improvements of friction elements - - clutch disks and brake shoes of asbestos with binder to improve corrosion resistance. Fr. 1,526,223, May 24, 1968. (CA 72:5968).

32. Soc. Anonyme Francaise du Ferodo.
Protective wall facing - - of a network of asbestos-based cross-pieces, etc.
Fr. 1,552,252 Jan. 3, 1969.
(CA 72:15496).

33. Sokolov, P.N.
Technology of asbestos cement products, 4th ed. Moscow, 1968. 295p. (Russ.)
(CA 72:15481).

34. Sullivan, R.I. & Athanassiadis, Y.C.
Air pollution aspects of asbestos - - on humans, animals, plants, and materials; also sources, concentrations, analysis, and abatement.
PB 188,080, Sep. 1969. 105p.
(USGRDR 2/10/70 p.78).

35. Szafnicki, Jozef.
Effects of physicochemical properties of raw materials on the quality of asbestos - cement articles - - discusses both cements and various kinds of asbestos. Cem.-Wapno-Gips 24/36 (6), 170-173 (1969). (Pol.)
(CA 72:35399)

36. Thompson, R. B.
Serpentinization accompanied by volume changes - - with description of chrysotile-bearing rock and chemical analyses of two rocks. Pac. Geol. 1968:1, 167-74.
(CA 72:14642)

37. Thorpe, P.H.
Economic selection of corrosion resistant materials for the pulp and paper industry - - evaluation and comparison of durability and cost of various materials incl. asbestos cement. Australas. Corros. Eng. 13 (6), 11-19, (1969).
(CA 71:114,391).

38. Varenikov, I. M.
Wastes from asbestos concentrating plants - a new type of raw material for the asbestos-cement industry. - - calcination of wastes, compression, and hardening produce substitute which increases in strength with time. Sb.Tr. Leningrad. Inzh.-Stroit.Inst. 1969 (56), 21-9. (In Russ.)
(CA 71:128,256).

39. Wagner, John C. & Berry, G.
Mesotheliomas in rats following inoculation with asbestos. - - in 40 - 63% of asbestos-injected rats. Brit. J. Cancer 23 (3), 567-81, (1969). (CA 72:29699)

40. Zaleskaya, I. M. & Others.
Microstructure and phase composition of refractory concrete - - composite thermal x-ray diffraction, and microscopic studies to detn. cause of hardening. Soversh. Metod. Issled. Tsem. Kamnya Betona 1968, 168-177. (Russ.) (CA 72:35381)
