Mr. A. A. Haymon, Jr.
Firestone Synthetic Rubber & Latex Co.
Lake Charles Plant
Drawer 1361
Lake Charles, LA 70602

Dear Mr. Haymon:

Thank you for your letter of June 15 regarding your code SY66 Talc.

The last two talc shipments from Whittaker, Clark & Daniels was 2606 grade from their mine at Allamore, Texas. Whittaker, Clark & Daniels reports the silica content varies from 1 to 2% at this mine with the average being 1.7%.

One suggestion we can make is to request a preshipment sample of our talc and if the silica content is within your specifications, then give us a release.

Another idea is to use Engelhard's Emtal 41. It is stated in their literature as having zero free silica.

The price on this material presently is \$.0290 per pound in carload, F.O.B. Johnson, Vermont. We stock in Houston and is priced at \$.059 per pound in 40,000 pound truckload, F.O.B. our warehouse.

We value this business, and want to work with you on this problem.

Very truly yours,

Ken Mundy
