Q Now, Doctor, we have talked about the tests that you have done, and we have talked about Dr. Millette's tests.

In addition to doing your own research with regard to fiber release and potential exposures, have you reviewed the literature with regard to other tests done by scientists regarding possible asbestos exposure during garage work?

A Yes, sir.

Q And where are those other studies or articles published?

A Everywhere.

Q Okay.

A I mean, there are some that have been in the NIOSH literature. There are some that have been in the various world literature. Some that have been in technical reports from various and sundry industrial organizations.

Q And have you attempted to compile a list of those studies and their results?

A I did, sir.
