MR. SHELLENBERGER: I am sorry, page 91, line 13.

A Job superintendent would tell the pipecoverer and we would go -- the asbestos worker, and we would go do whatever he told us to do.

Q Was there a difference between the Owens-Illinois product and the BEH product?

A Yes, I would say there was a difference.

Q What was the difference?

A Different texture. If I saw the product, I probably could tell you the difference, but right now I couldn't.

Q In terms of the use of the product, were they using one for one type of use and the other for a different use?

A No, you could mix it.

Q You could use them interchangeably?

Do you have a sense of whether you used more of one type of product than the other on this job?

A No, I would not know. It was a lot of it.
