September 9, 1970

Otis E. Fancher, Ph.D.
Industrial Bio-Test Laboratories, Inc.
1810 Frontage Road
Northbrook, Illinois 60062

Dear Otis:

Our previous correspondence will indicate that you are going to bill us for the costs of the Aroclor studies for the third and fourth quarters of 1970 so that we can make payment before the end of the year. In addition we would like to include in our costs this year additional payments for work now underway which may or may not be finished by December 31.

These items include the following:

1. The adjusted cost for the repeat of the fish toxicity work.

2. The chicken-egg production, etc. study with the new sample of Aroclor 1242.

3. The acute and 90-day rat studies for IBT-40.

4. The acute toxicity and 90-day rat studies for MIPB.

5. The cost of "birth defect" studies according to your proposed protocol.

Based on some of our previous correspondence and discussions, I have estimates for some of the above projects but I would appreciate it if you would let me know the cost of the individual items.

If we need to discuss this further, please give me a call.

Sincerely,

Elmer P. Wheeler
Manager, Environmental Health
