ALL ST. PAUL DIVISION AGENTS:

We again call to your attention the fact that under no consideration should you ever enter a storage tank for any purpose whatsoever, without first receiving special permission from this office. In those cases where it is necessary to enter a tank, we will have our own service men do this, and they will be equipped with the proper safety clothing, tools and gas mask for this purpose.

Please remember this and be guided by it at all times and if at any time you believe it necessary to enter a storage tank, please get in touch with this office and we will arrange to have that work done by one of our regular service men.

Yours very truly,
CITILS SERVICE OIL CO.
