Mr. Vandiver Brown, Secretary
Johns-Manville Corporation
22 East 40th Street
New York 18, New York

Dear Mr. Brown:

This will acknowledge your letter of March 21, 1961 concerning the Saranac Laboratory asbestos dust experiments. We also thank you for the reprint which you enclosed and which appeared in a recent issue of the ARCHIVES OF INDUSTRIAL HYGIENE AND OCCUPATIONAL MEDICINE.

We quite agree with you that the project was well worthwhile. I think it is one of the most valuable studies to date on the subject of asbestosis. As you are probably aware, there is not a great deal of authoritative information on this subject in the literature and it is my belief that this experimental work constitutes a real contribution to our knowledge of industrial diseases of the lungs resulting from exposure to dust.

I think the industries who participated are to be congratulated on their progressive outlook in affording the opportunity for such an important investigation.

Yours sincerely,

L. E. Hamlin

L. E. Hamlin, M. D.
