Air Releases Reported
to the U.S. Environmental Protection Agency
Toxic Release Inventory (TRI)

In preparing for the congressional debate about the Clean Air Act reauthorization, the Chemical Manufacturers Association is compiling the 1987 and 1988 TRI data from the chemical industry.

Please complete this form by inserting the appropriate information from EPA's Form R. For your ease, we have identified the line number from Form R.

For the total air release data, if you used the A.2 column to report estimated emissions, enter the sum of lines 5.1 and 5.2. If you used the A.1 column, please record the actual estimate that you used to determine which range applied to your facility.

Send the completed form, by October 13, 1988, to Ann M. Mason, Associate Director, Environmental Division, Chemical Manufacturers Association, 2501 M St. N.W., Washington, D.C. 20037.

Thank you for your help. With these data, CMA can better act on behalf of the chemical industry.
