Dr. Lyon Mandelkorn
Westinghouse Research and Development Center
Beulah Road
Church Boro
Pittsburgh, Pennsylvania 15232

Dear Dr. Mandelkorn:

Attached to this letter is a copy of the review article by Dr. Peakall which we discussed recently over the phone. It is one of the articles referred to at our recent meeting and it presents a fair summary of some of the PCB toxicity work which has been done as well as a listing of the specific reference sources.

As I indicated, Elmer Wheeler of our Medical Department, is our expert in this area and as such, he should be consulted for any further information on the toxicity of PCB's.

I hope that you were able to contact Elmer to obtain answers to your questions.

Sincerely,

E. S. Tucker
