SUBJ: SOLVENTS NATURAL TEAM ACTION ITEMS

VISTA

I'm not sure what kind of minutes we'll get, but here's what I think they put on our agenda:

1. Review toxicity needs for 1416 N-Paraffin
2. Develop VOC summary document
 - JCL is doing
3. Develop biodegradation document
 - We'll need AMN's help
4. Develop document on dioxin and dioxin precursor
 - DP to talk to Sorenson on analytical
5. Consider method to routinely update solvents team on regulatory issues

Let's discuss after the holidays.
