SUBJECT		

Employee Interviews With W. J. Wilcox,
Manager Of Employee Relations, Clev.

Mr. W. J. (Bill) Wilcox has requested a series of interviews with a number of our employees who have at least twenty years of service and have had considerable work history with vinyl chloride and PVC. Bill has asked that at least twenty individuals be selected for an interview of approximately one hour. The interview will include the filling out of a questionnaire and discussion concerning each employee's recollection of his work in PVC.

Bill asked me to point out that no identification will be used on the questionnaires except whether an employee is in production, maintenance, technical or supervision. He assures complete anonymity for the people interviewed. These people were to include twelve production workers, three maintenance workers, three supervisors, and two technical people.

The people were to be selected randomly from a list containing all plant personnel with twenty or more years service. To accomplish this, a table of random numbers (Table VIII, 1) from Industrial Experimentation by K. A. Brownlee was used.

Attached is a schedule for the interviews, set up so as not to conflict with other commitments Bill has while here. He plans on arriving Wednesday morning, June 12 and staying through Friday, June 14. All interviews are scheduled for old Conference Room B.
