

ONE STEP AHEAD

STAY IN TUNE WITH NEW BRAKE TRAINING

Help your employees and customers learn new brake systems and how to troubleshoot problems with NAPA Brake's training videotapes and anti-lock brake manuals. The three-part video covers servicing and repair for basic disc and drum brakes, new systems and imports including Honda and Nissan. In a separate series, NAPA United offers thorough coverage of several types of anti-lock brake systems—Teves, Bosch and Kelsey-Hayes with a four-part manual.

To order these packages, contact your Distribution Center.

VIDEO TRAINING FOR MONITOR 2000

Technological advances offer a challenge to even the most prolific technician and serious DIYer to stay current with automotive changes and improvements. To assist these consumers Balkamp offers an instructional videotape to keep customers informed on applications for the Monitor 2000. Tapes are available to review either Ford or GM vehicles. The program covers tester operations and thoroughly explains the various display models. The training package includes a 1987 manual from the manufacturer in addition to the videotape. For more information contact a Balkamp sales representative.

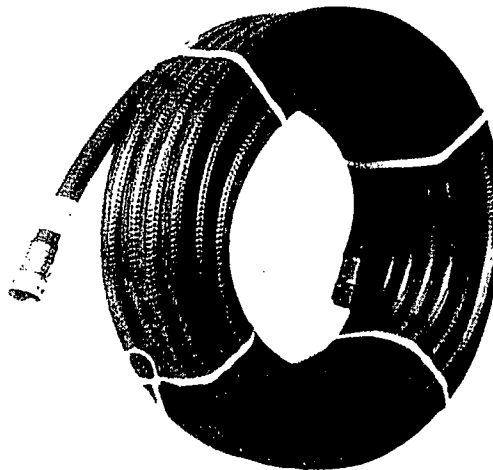

LONG-TERM LEGEND

You can now offer your customers the top of the line among all batteries with increased reserve power, long-term durability, and extended warranty protection—the LEGEND™.

NAPA Batteries offers the LEGEND™ with up to 2 hours and 25 minutes reserve power. Cars will have an extra margin of protection, in case the lights are left on or additional electrical accessories—car phones, auxiliary lights and on board computers—are attached.

The long-term warranty coverage of more than six years is an extended warranty over other premium batteries. An Ancor-Lok construction bonds the plates into one solid unit to ensure long-term durability. This minimizes vibration problems associated with small engine vibration or off road driving. The LEGEND™ is designed with a handle on most popular sizes making this battery easier to carry and install.

Your customers will be glad to know that the LEGEND has plenty of starting power—up to 650 cranking amps. As an introductory offer for the LEGEND, consumers will receive a \$10 rebate with each purchase by August 15.

HOSES FROM NAPA BALKAMP

It's summertime and customers spend more time outdoors to work on the lawn, pool, boat or camper. NAPA Balkamp now offers the hose to handle chores in the outdoors. In addition to the line that was previously offered through NAPA Belts and Hoses, a new, 50-foot and 1-ply garden hose was added.
