Dear Sirs:

Minutes of the Special Meeting held on April 18th and 19th at Clearwater, Florida, were approved at the last regular meeting of the Association held on June the 9th, with the proviso that the second paragraph of page 9 of the minutes of the meeting of April 18th and the second sentence of the first paragraph of page 8 of the minutes of the meeting of April 19th be eliminated.

Accordingly, would you kindly destroy said page 9 and page 8 and substitute the attached revised pages.

Sincerely yours,

Paul A. Filteau

Paul A. Filteau,
General Manager.

industry as a whole will come out in good shape in most of its now strong positions.

We should now be in a position to effectively seek from Quebec and Ottawa Governments subsidies to support the implementation of our programme.

At this point, the Chairman remarked that sufficient funds were available; it is assumed that Cassiar will continue its annual contribution of \$10,500. and it has been decided that Advocate Mines would participate in the programme.

In answer to a question, it was agreed that a copy of Dr. McDonald's report should go to the Union prior to releasing same for public consumption.

ADJOURNMENT

There being no further business, the meeting was formally adjourned.

Paul A. Filteau,
General Manager
&
Secretary.

Counsel of the Association be discussed between himself and the Directors.

GENERAL BUSINESS CONDITIONS

In the U.S., supply and demand in industry are in balance. In spite of the change in Government Administration, inflation is still rampant. Capital expenditures are expected to be some 14% higher in 1969. The long term outlook for the construction industry is strong; from 1,650,000 housing starts originally forecast a reduced estimate still points to 1,575,000 starts.

In U.K., the political situation is still bad. Plants are running far below capacity. Fibre sales to U.K. are not likely to improve. Fortunately, the textile industry is very active in spite of the dreaded health problem.

In Canada, it was observed that certain companies were enjoying a period of profitless prosperity. However, leaders were more optimistic for next year. As regards future developments, it was announced that in connection with the Asbestos Hill project a concentrate and fibre treatment plant, having a capacity of some 100,000 tons of group 4 and 5 fibre, would very likely be built in one of the Benelux countries.

ADJOURNMENT

There being no further business, the meeting was formally adjourned.

Paul A. Filteau,
General Manager
&
Secretary.
