Dr. George Calingaert
Ethyl Gasoline Corporation
7600 West 8 Mile Road
Detroit, Michigan

Dear Cal:

Thanks for the information in your letter of September 27th about the plans of Dr. MacConnell for exhibiting tetraethyl lead among other industrial hazards.

First you are probably aware that I shall not be able to attend the Detroit meeting since I shall be on my way to South America at that time. However I would appreciate having any information about Dr. MacConnell's exhibit which may be of interest.

I am taking this occasion again to call your attention to my letter originally addressed to Dr. Edgar, concerning various phases of the problem of lead in exhaust gases. There is no rush about this but I would appreciate having such information as is available at your convenience. It would be very useful to have some of the data in support of the statement in the letter which Dr. Beatty sent me on this subject.

Sincerely yours,

RAK:is

Robert A. Kehoe, M.D.
