Dear Doctor Curtis:

I forward herewith the report of the last series of analytical findings. These need not be discussed at any length at this time, for the brief comments made on the analytical report are all that can be justified.

It seems likely to me, as I said to Mr. McGregor on the telephone yesterday, that we shall come out of this survey with a completely negative set of results. I do not believe that samples collected two weeks after these will show a significant change.

Sincerely yours,

---
