February 21, 1973

Dr. Robert A. Kehoe
College of Medicine
University of Cincinnati
Cincinnati, Ohio 45219

Dear Dr. Kehoe:

Enclosed is a revised version of the manuscript by Rosen et al, together with the letter of transmittal of the author and copies of the reviews of the original manuscript.

I regret the necessity for requesting further assistance with this paper but in view of the author's letter, it does seem appropriate to resubmit it to the original reviewers.

You will note there are two comments from reviewer II. After your evaluation was received, the paper was returned to him, with a copy of your review, and the xerox copy marked IIa represents his second appraisal. He is also being sent a copy of the revised paper.

We will appreciate your help in reaching a decision.

Sincerely yours,

Joseph M. Garfunkel, M.D.
