We have designed the Seminar around your active participation, and its success depends on that participation. So, don't come expecting three days of speeches. The Seminar "faculty" will serve in large measure as discussion leaders.

I know that many of you have questions and ideas about many of the documents and witnesses. Don't wait till Captiva to review these items and formulate your ideas and questions. Do it now. Also, if there are other people or documents you wish to discuss don't be reluctant to bring them up at the Seminar. Only in this way will we generate the discussion that will help all of us.

We look forward to seeing you at Captiva.

Yours truly,

Dennis H. Markusson
