TITANOX-B
helps manufacturers produce
coated stocks that meet
buyers' needs...

● Paper buyers are always demanding something new in coated stocks. Why not open up new fields of use by developing new stocks or improving your present products through the use of Titanox-B (barium base) or one of the other remarkable Titanox pigments? ● Here's why Titanox-B (barium base) helps produce better coated stocks: It has (1) fine particle size; (2) exceptional brightness; (3) high color value; (4) chemical inertness; (5) high refractive index; (6) moderately high bulking value. Uniformity of color and ease of dispersion are among those other desirable characteristics of Titanox-B which have assisted paper manufacturers to produce stocks with superior opacity and whiteness. ● Now is the opportune time to test Titanox pigments. Our paper chemist will gladly work with yours in the solution of your problems. May we help?

TITANIUM PIGMENT CO., INC.
Manufacturers of TITANOX-B (Barium Base)
TITANOX-C (Calcium Base)
PURE TITANIUM OXIDE

111 Broadway, New York, N. Y.; Corondelot
Station, St. Louis, Mo.; Pacific Coast Dis-
tributors: National Lead Company of Califor-
nia, 2240 24th Street, San Francisco, Califor-
nia; Canadian Distributors: Wilson, Paterson,
Clifford, Ltd., 101 Murray Street, Montreal-
