Memorandum on General Asbestos and Rubber Plant of

Raybestos-Manhattan, Inc.

Supplementing The

General Report

"Preliminary Dust Investigation For Asbestos Textile Institute"

Of June, 1947

Dustiness

This plant is designated in the general report as B.

The samples taken by us were all lower than one million, but since they were single samples and differed considerably from other data in company files we did not give them full weight in estimating the average range given in column B of Table 1 (page 5 of general report).

The company's dust count record indicates the longest period of low dustiness in the industry.

In spite of the span of years covered, the number of individual dust counts is such too small to constitute an adequate record. Management indicated that a re-survey was to be made after certain process changes were effected. However, it is our opinion that present concentrations are very
