MEMORANDUM

To: Mr. J. C. Genzabella

From: Mr. C. J. Lobos

Subject: BORG-WARNER

During my telephone conversation with Warren McColl this morning, he mentioned that although they have been given a clean bill of health in their asbestos handling procedures, Hydramatic is very much concerned about Borg-Warner's source of paper supply. Warren would like to know what our status is in reference to the manufacture thereof and requested a written document to be presented to those concerned. Does Manufacturing have any such data that could be officially presented?
