test transformer fluids

Dear Sir:

On December 15, 1971, Mr. Howard Bergen wrote your company of Monsanto's sales termination of the Therminol® FR series. At that time, we offered to pay freight cost incurred in returning the Therminol FR to us and costs for proper disposal of the material (by high temperature incineration) ~~at our Sauget, Ill. plant~~.

We are now writing to advise you that, effective July 1, 1972, Monsanto will terminate this offer for return freight and free incineration of Therminol FR series fluids.

We will, however, continue to make available our high temperature incineration service for proper disposal of any Therminol FR fluid or fluids contaminated with PCB's*, which your company may have on hand, on the following basis:

1. We will charge 3¢/pound to incinerate fluids sent freight prepaid to our Sauget, Illinois plant for:
   a) Therminol FR series fluids,
   b) Therminol 55 or 66 containing PCB's,
   c) Monsanto's MCS-681 flush fluid used for flushing a PCB heat exchange system.

2. We will charge 5¢/pound to incinerate fluids sent freight prepaid to our Sauget, Illinois plant for non-Monsanto combustible flush fluids contaminated with PCB.

3. In the event you use a non-Monsanto combustible flush fluid but fill your system with a Monsanto Therminol series product (i.e. Therminol 55, 66 or 77), our incineration charge will be 3¢/pound on flush fluid sent freight prepaid to our Sauget, Illinois plant.

Delete - We can cover this point after contact & further determination of flush fluid with customer R

*Polychlorinated Biphenyls
