

Interoffice Communication

To John Friend
From J. J. Hall
Date March 10, 1980
Subject DR. KURT M. DUBOWSKI

Dr. Dubowski (resume attached) has just been appointed to the Scientific Advisory Committee of the Chemical Industry Institute of Toxicology (CIIT).

Since he lives in Oklahoma City, Dr. Dubowski might be a good "expert" to talk with the neighborhood, if further talks are necessary. I found that Dr. Dubowski has an excellent professional reputation and I was assured that he would thoroughly research the question of PVC/VCM toxicity and provide an objective viewpoint if we were to ask for his help.

Keep me posted on any new developments and if it appears logical, I can come to OKC, talk with Dr. Dubowski, and assess whether he would be the right person for that job.

J. J. Hall
