I am enclosing a brochure describing our new Health and Safety computer program which was designed and written by Rick Hanson, Will Spies and Randa Jabbour of our ISD Department. This is a "state of the art" program, which is not available on the open market and tailored for CertainTeed usage.

This system allows us to track CertainTeed employees with respect to their health parameters and exposures in our plants. Its purpose is to monitor those exposures and correlate them with the individual health characteristics of the employee.

The institution of this program is a major development in our continued emphasis on preventive medicine within all CertainTeed locations. If you have the time, please call Susan Drexler at 7603 and arrange for a demonstration.

CertainTeed
Health & Safety System
Reference Card

The Health and Safety System tracks medical data on CertainTeed employees through physical exams, health/exposure questionnaires, and mortality information and collects/ calculates industrial hygiene survey information. Through a series of menus, the system guides you through the major Health and Safety functions and allows you to produce standard and custom reports.
