Samantha –

Don't worry about talking chemicals or pesticides! This group isn't issue-specific; they cover a broad array of environmental issues in the air/climate, water, and waste world. We tend to keep things generally high-level and the weedy stuff gets covered at the subgroup level.

I'm thinking that some general background on you, your role, what your office does, what general goals you have going forward, the reg reform process and efforts, how everything works in the reg reform and Office of Policy world etc. would be great if you feel comfortable touching on that. I've been working with them on reg reform for the past year (since I joined ACC), but it's still a relatively new concept for some of them. And if you don't know how to answer their questions, it's not a big deal.

Does noon work for you?

Call me if you have any questions or want to talk more before Tuesday. And thank you so much for agreeing to come.

I'm looking forward to meeting you!

ACC is located at 700 2nd Street NE, and the meeting will be on the 10th floor. You'll have to check in with the front desk both in the lobby and then on the 10th floor. They'll let me know when you're here.

Anna,

You are not a pest, I am sorry I have been out of touch on this. I am happy to accept the invitation to speak -- however, I am a bit worried that I won't have anywhere NEAR 45 minutes of speaking material or even Q&A, since I am not in the pesticide/chemical office. I could give 5-7 minutes of general updates about the agency's reg reform work and if there are specific rules you'd like me to touch on I can go into those but I am just worried your members might be disappointed if they are expecting too much! Either way, happy to do it.

Hey Samantha,

I hate to be a pest but I know I am. Any confirmation on your coming by next week?

Thanks,

Anna

Samantha,

I'd like to invite you to be the guest speaker at ACC's Environmental Management Committee's Spring Meeting on May 23, 2017.

This committee, which I manage, is comprised of 35 Board-approved representatives from our member companies and provides policy direction to ACC's air, waste, and water workgroups. The EMC's top priority for this next cycle is regulatory reform, and they would benefit greatly from hearing from you.

In the past, our guests have come for about 45 minutes around lunch time. Some have stayed for only a half hour, some have stayed for an hour, depending on their availability. The format is flexible and generally informal, involving a short presentation and a Q&A portion at the end.

If you have any questions, please feel free to contact me at the number below. I'm also available by email.

Best,

Anna
