Subject: RE: CF Issues

I spoke with Mike about this on Wednesday and have drafted a BD and Benzene Shanghai document. See attached. I know Mike has since made some refinements to the BD document (and perhaps benzene as well. Note the benzene document should also be reviewed by Patsy).

Stu,
When Mike and I met with Susan, we developed a number of items and processes to capture what 'big' items are being worked on by CF HSE. The obvious such as VCCEP, HPV, REACH come up but so do a few big PBU subjects. including Butadiene. I have attached a template we are using and a couple of examples I have done. Will you have some time to help get this done for butadiene next week??

See you next week
