Subject: CONTROL OF ASBESTOS DUST

In my visits at most of our locations, I find two things about our efforts to control Asbestos Dust.

1.) For the cutting of panels, everyone is making an effort to keep this operation under control.

2.) When installing the panels, hardly anyone follows the procedures or used all the equipment available to them, - vacuum equipped saber saws, drill motors and hole saws.

This situation must improve. We cannot tolerate anything less than complete compliance. You have the equipment, - USE IT!
