SUBJECT: ASBESTOS AIR SAMPLING

Two air samples collected by you in Building 401, Raw Material Storeroom on 2/25/76 were analyzed in this laboratory on 3/16/76 for asbestos content. Both results summerized below are well in excess of the Federal (OSHA) ceiling limit of 10 fibers per cc. As we discussed by telephone, we agree that this operation be terminated at once and the work sub-contracted to an outside vendor until such time as a satisfactory non-asbestos substitute can be found. Appropriate medical examinations and records must be considered.

| I.H. Sample # | Cassette # | Operator Name/ S.S.# | Sampling Period | Result (fibers/cc) |
|---|---|---|---|---|
| 4903 | A-10 | Walter Jackson (167-07-2839) | 9:05 a.m. - 9:10 a.m. | 35. |
| 4904 | A-11 | (Area Sample, rear of cut-off saw) | 9:22 a.m. - 9:27 a.m. | 123. |

If we can be of further assistance in this matter please advise.
