Mr. W. N. Gattel - Tigard

THIS COPY FOR C

Thanks for your field test report. We certainly agree to furnishing the non-asbestos formula to Memphis if 50 bags receive good acceptance. The asbestos safety hazard is becoming so critical it is a major item being considered by the Gypsum Association. There will be no let-up from GMAA restrictions and any result in prohibitive costs unless we eliminate asbestos entirely as a raw material.

We would appreciate knowing how the 50 bags work out.
