RE: REFRASIL SEMINAR

In light of the positive response to my letter of 1977 SEP 22, the referenced seminar will be held on Tuesday, 1977 OCT 25 at 2:00 PM in Room 870 AB. Because we can not schedule a similar meeting at ATC at this time, the Alcoa Research personnel are invited to the Pittsburgh meeting.

RE: REFRASIL SEMINAR

Hitco, the manufacturer of Refrasil, has offered to present a two hour seminar on the properties and applications of this material within the aluminum industry. Refrasil is essentially a refractory silica in textile form which has received industry wide acceptance in all applications requiring high temperature insulation without resorting to asbestos base materials.

The exact date and place for this meeting has not been selected, but it will be held, if warranted, sometime after 1977OCT17. If there are enough people from both Pittsburgh and the Alcoa Laboratories to warrant separate sessions, this will be done.

We would appreciate the cooperation of all recipients of this letter to forward to my attention on or before 1977OCT12 the names of those persons who may be interested in attending the Refrasil Seminar.
