Subject: Pensioner Blood Data

Gary,

Here are the results for C-8 in blood for all pensioners who were tested in both 1995 and 2000. All of these results are after retirement and any on-job exposure has ceased. It looks like the half-life estimate will still be about four years.

Employee Code #	Sample Date	ppm C-8
232409595	3/1/95	1.1
	4/6/00	0.34
273300446	3/1/95	4.3
	4/21/00	2.1
236468869	3/1/95	2.4
	4/21/00	1.3
236441393	3/1/95	0.72
	4/7/00	0.40
234268700	6/30/83	8.4
	7/19/84	5.9
	3/1/95	0.94
	4/6/00	0.16
236447487	3/1/95	2.2
	4/7/00	0.68

Let me know what else you need.

Long 1/2 life.
