

INTER-OFFICE M

INECO CHEMICALS, INC.

OCT 20 1978

TO	Plant Managers*	AT		DATE	October 18, 1978
FROM	Mr. F. S. Klopp	AT	Piscataway	COPY TO	W. Anderson G. Flint R. Gottesman M. Haymon W. Rupp J. Sandstedt.
SUBJECT	EPA COMPLIANCE				

This is to assure there are no misunderstandings as to the policy regarding EPA compliance. We will strictly adhere to all EPA regulations as interpreted by the Environmental and Regulatory Affairs Department, who has the responsibility to seek legal advice as they feel necessary. This particularly applies to notification and reporting to EPA regarding excursions. I believe Mr. Sandstedt has reviewed these requirements with you and specific questions should be directed to him regarding the regulations.

Any problems in adherence to the policy must be immediately directed to myself or Mr. Rupp.

F. S. Klopp

INTER-OFFICE MEMO **TENNECO CHEMICALS, INC.**

TO	Mr. J. T. Sweeney	AT	Flemington	DATE	October 30, 1978
FROM	Dr. R. T. Gottesman	AT	Saddle Brook	COPY TO	W. P. Anderson (w/o att.)
SUBJECT	<u>EPA COMPLIANCE ORDER</u> <u>FLEMINGTON PLANT VCM EMISSION STANDARD</u>				G. S. Flint "
					M. R. Baymon "
					F. S. Klopp "
					R. H. Marks (w/att.)
					P. T. O'Brien
					W. Rupp
				✓	J. P. Sandstedt

I attach a copy of Paul O'Brien's memo to me of October 27 and a copy of the U.S. E.P.A. - Region II Compliance Order requiring the Flemington plant to be in compliance no later than November 20, 1978. If the plant is not in compliance by this date, Tenneco would be required to cease and shut down any part of the plant which emits or may emit VCM emissions. Essentially, and in simple terms, this would mean a shut down of your plant.

As I discussed with you during my visit to Flemington on October 27, it is extremely vital to maintain the high-level activity currently underway to "shake-down" the new pollution control equipment (particularly the water stripper and incinerators) to solve any operating problems encountered, and to develop the necessary data and analyses which can be presented to EPA to show that we are not only operating all pollution control equipment but that we are operating within the limits required by VCM NESHAPS.

Messrs. Anderson and Sandstedt of my department will be working with you and Engineering to assure that such compliance testing is completed well in advance of the November 20 date.

Problems of any consequence that could lead to our failure to achieve compliance by November 20 should be brought to my attention immediately.

Thanks in advance for your cooperation.

R. T. Gottesman
